

What you can expect from TAAS

Our Live Online sessions will cover a range of subjects, explore them below.

Innovation

Our virtual classroom is cutting edge, featuring virtual whiteboard technology, a chat system so students and teachers can interact, and much more.

Hands-on experience

Learners of our Live Online Classes will take part in hands-on projects, which will help you gain experience and will reinforce the lessons.

Never miss out

All the lessons are recorded and will be uploaded to the learning portal, so you'll never miss a thing.

How it works

Live discussions are highly beneficial to the learner as it gives you the opportunity to ask questions and listen to the viewpoint of other participants. Live discussions through an online learning platform are convenient and advantageous to the learner.

1. The presentation is delivered live. The session will have an instructor and a group of participants where the instructor delivers content using up-to-date technology.
2. You are provided with a platform to clear any doubts, ask questions, and engage with other students. It is an interactive and engaging discussion that learners will find very beneficial to their course of
3. Participants can listen to an audio voiceover of the instructor. In most instances, slides, demonstrations, and videos are used.
4. Participants have the freedom to pose any question, take part in polls and surveys to improve the effectiveness of a webinar.
5. Participants are allowed to have one on one interaction with the instructor if required
6. Some webinars allow the audio system to be activated so that attendees can ask questions which can be heard by the others.
7. Webinars can be delivered in two ways, live and pre-recorded.

Benefits of live sessions

- Live discussions will help you have an enhanced learning experience.

- Students can interact with their peers and instructor through emails, live chats and newsgroups.
- Live presentations can be viewed any number of times as students have access to this content.
- Webinars provide consistency for learners. Every single participant will have access to the same content, guidelines, and training.
- It is a flexible platform allowing learners to choose a time and place most convenient to them.
- You will hear different viewpoints which will help you enhance your knowledge on the subject.
- The Q&A session will take place in real time.
- Online learning is less costly because you don't have to spend on travel or buying expensive textbooks
- Online learning provides students with a comfortable learning environment which lets them approach the instructor with ease.

Become a qualified practitioner

Our live online programmes can help you go further. Our live online programmes have been created to help you further your career, and we believe that the lectures will be an instrumental part of this. Learners will be able to interact with instructors in real-time, which will allow learners to ask questions, and will promote a more open and informative learning environment. If you want the classroom experience, then these courses could be for you. Attend class wherever you are, all you need is an internet connection, and we will do the rest. **‘Try us by enrolling on one of our programmes today**

Why Choose Us

Share your Passion

Watch your students transform into skilled individuals and develop passions of their own.

Feel Supported

Our professional team is an integral part of TAAS and its ethos.

Join a team of valued teaching professionals
